

SEVANEST

Verified Help. Trusted Homes.

SOFTWARE REQUIREMENTS SPECIFICATION (SRS)

Household Workforce Marketplace for Maids, Drivers & Home Staff

Attribute	Detail
Product	SevaNest – Customer App + Worker App + Web Admin Portal
Document type	Software Requirements Specification (derived from SevaNest PRD)
Source document	SevaNest PRD (Product Requirements Document / Development Brief)
Proposed development partner	VPD Technologies Pvt Ltd
Primary launch market	Hyderabad
Platforms	Android, iOS & Web Admin
Planned duration	4 Months / 16 Weeks
Project type	Marketplace + Workforce Management Platform
Version / Status	1.0 – Draft for review and sign-off
Classification	Confidential

1. Introduction

1.1 Purpose

This Software Requirements Specification (SRS) defines the functional, non-functional, interface, data and operational requirements for SevaNest Version 1. It is derived from the SevaNest PRD and is intended to serve as the agreed basis for design, development, testing, UAT and acceptance by the product, business, development (VPD Technologies Pvt Ltd) and QA teams.

1.2 Product Scope

SevaNest is a simple, trusted and scalable household workforce platform connecting customers with verified maids, drivers, cooks, babysitters, elderly-care helpers and house-cleaning workers. It supports recurring household employment as well as short-term service requirements. The product consists of three components:

- Customer Mobile App (Android and iOS)
- Worker Mobile App (Android and iOS)
- Web-based Admin Panel (operations portal)

Core principle: simplicity. Customers should find a suitable worker in a few steps; workers should register, verify identity, specify availability and receive job opportunities without a complex interface. Launch city: Hyderabad, with a city-by-city expansion model.

1.3 Product Goals

- Make household staff discovery and hiring simple and structured.
- Create a trusted worker-verification and customer-verification process.
- Support recurring monthly employment as well as daily/hourly requirements.
- Provide interview, booking, payment, attendance, rating and replacement workflows.
- Give operations teams complete control through an admin dashboard.
- Build a scalable technology base for multi-city expansion.

1.4 Product Name Rationale

"Seva" represents service/help and "Nest" represents the home. The name is broad enough to include maids, drivers, cooks, caregivers and future home-service categories. SevaNest is a working product name; trademark, company-name and domain availability must be verified before public launch.

1.5 Definitions, Acronyms and Abbreviations

Term	Definition
SRS	Software Requirements Specification
PRD	Product Requirements Document
V1	Version 1 – the first production release (4 months / 16 weeks)
KYC	Know Your Customer – identity/document verification of a user
OTP	One-Time Password sent to a mobile number
UAT	User Acceptance Testing
RBAC	Role-Based Access Control
SLA	Service Level Agreement (support resolution targets)
FCM	Firebase Cloud Messaging

Term	Definition
Customer	A household user who hires or manages household staff
Worker	A household staff member (maid, driver, cook, babysitter, elderly-care helper, cleaning helper)
Engagement	A hiring arrangement between a customer and a worker (full-time, part-time, daily, hourly, live-in, shift, one-time)
Replacement	Workflow to substitute a worker in an existing engagement with an alternative worker
Admin Masters	Admin-configurable reference data (categories, areas, fees, plans, templates, roles)

1.6 References

- SevaNest PRD (SevaNest_PRD.pdf) – primary source document.
- Original source: SevaNest | VPD Technologies – 4-Month Project Report (14 pages), as cited in PRD Appendix A.

1.7 Document Conventions

- Requirement IDs use the format PREFIX-NNN (for example, FR-AUTH-001).
- "Shall" denotes a mandatory requirement. Priority "Must" = required for V1; "Optional" = included in V1 only where the PRD marks it optional.
- "PRD Ref" cites the PRD section from which the requirement is derived.
- Items the PRD leaves to be finalized or defined later are recorded as open items in Section 14 and are not assigned invented values.

1.8 Document Overview

Section 2 gives the overall description. Section 3 specifies functional requirements. Section 4 covers external interfaces. Section 5 lists non-functional requirements. Sections 6 to 8 cover data, architecture and workflows. Sections 9 to 13 cover reporting, delivery, acceptance, risks and roadmap. Section 14 lists open items; Appendix A is the PRD-to-SRS traceability matrix.

2. Overall Description

2.1 Product Perspective

SevaNest is a new, standalone marketplace and workforce-management platform composed of two mobile applications and a web admin portal, all backed by a common cloud-hosted API and database. It integrates with third-party services for payments, maps, push notifications, SMS (and optionally WhatsApp) and identity/background verification.

2.2 Product Functions (Summary)

- OTP-based authentication; customer and worker profiles
- Service-category selection; location and availability filtering
- Worker KYC/document upload and verification status
- Search and matching; shortlist/favourites
- Interview/trial request; booking and confirmation
- Payment gateway integration, receipts, transaction history and refund status
- Attendance/status tracking
- Ratings and reviews
- Replacement request workflow
- Support/complaint tickets
- Push, SMS and optional WhatsApp notifications
- Basic dashboards and reports; role-based admin access
- Cloud deployment, monitoring and backups

2.3 User Classes and Characteristics

User Type	Primary Purpose	Key Actions
Customer	Hire/manage household staff	Search, shortlist, interview, book, pay, rate, replace
Worker	Find and manage job opportunities	Register, verify, set skills, availability, accept jobs, attendance
Operations Admin	Run day-to-day marketplace	Verify, match, assign, support, replace, monitor
Super Admin	Platform control	Roles, policies, reports, configuration, audit access
Verification Executive	KYC/background workflow	Review documents, status, remarks, re-verification
Support Executive	Customer/worker support	Tickets, disputes, escalations, resolution tracking

Worker users may have low digital literacy; the Worker App must therefore use large buttons, limited text, simple status labels and be ready for local languages, with complex forms split into short steps.

2.4 Service Categories (Version 1)

Category	Typical Engagement	Example Requirement
House Maid	Part-time / Full-time / Live-in	Cleaning, utensils, basic household support
Driver	Hourly / Daily / Monthly	Personal/family driver, temporary driver
Cook	Part-time / Monthly	Breakfast/lunch/dinner preparation
Babysitter	Hourly / Full-time	Child supervision and basic care

Category	Typical Engagement	Example Requirement
Elderly Care Helper	Shift / Full-time	Non-clinical assistance and companionship
Cleaning Helper	One-time / Hourly	Deep/basic cleaning assistance

Version 1 shall avoid excessive categories. New services shall be enabled later through configurable admin masters rather than requiring a separate app redesign.

2.5 Operating Environment

- Customer and Worker apps: Android and iOS (single Flutter codebase recommended).
- Admin portal: supported web browsers (React recommended); the supported browser/device matrix is to be defined for UAT.
- Backend and data: cloud-hosted (AWS or Azure), PostgreSQL, Redis/managed queue, object storage.

2.6 Design and Implementation Constraints

- Delivery within 16 weeks; achievable only with parallel workstreams and controlled V1 scope.
- Major requirement changes after design sign-off shall go through a formal change-request process.
- Pricing and fee values shall not be hard-coded; they shall be admin-configurable.
- Trust/verification rules: a worker shall not be presented as fully verified until configured checks are completed and approved by an authorized operations user.
- Terms, privacy policy and consent flows shall be legally reviewed before production release.
- Facial-recognition attendance, if ever introduced, is subject to legal review and is out of V1.

2.7 Assumptions and Dependencies

- Third-party providers (payment gateway, maps, OTP/SMS, FCM, optional WhatsApp, verification partner) are available and sandbox access is obtained early.
- A dedicated operations team exists for verification, matching and support at launch.
- Police verification and some other checks are external processes; the platform tracks status/documents only.
- A defined device/browser test matrix and sufficient test devices are available.
- Critical delivery roles are not shared across too many other projects.

2.8 Out of Scope for Version 1

- Automated payroll and statutory payroll compliance
- Worker loans/credit products
- Insurance marketplace
- Facial-recognition attendance
- Complex AI recommendation engine
- Full apartment-society ERP
- Advanced corporate workforce module
- Multi-country operations

3. Functional Requirements

All requirements below are in scope for Version 1 unless marked Optional.

3.1 Authentication and Session Management

ID	Requirement	Priority	PRD Ref
FR-AUTH-001	The system shall authenticate customers and workers using mobile OTP.	Must	PRD \$1, \$2.1, \$11, \$13
FR-AUTH-002	The system shall use token-based sessions after successful OTP verification.	Must	PRD \$1, \$2.1, \$11, \$13
FR-AUTH-003	The system shall apply rate limiting and abuse protection on OTP and API endpoints.	Must	PRD \$1, \$2.1, \$11, \$13
FR-AUTH-004	The system shall provide role-based login for admin users (Operations Admin, Super Admin, Verification Executive, Support Executive).	Must	PRD \$1, \$2.1, \$11, \$13
FR-AUTH-005	The system shall store admin passwords and integration secrets securely.	Must	PRD \$1, \$2.1, \$11, \$13

3.2 Customer Registration and Profile

ID	Requirement	Priority	PRD Ref
FR-CUS-001	The system shall allow a customer to register and log in using mobile OTP.	Must	PRD \$5.1
FR-CUS-002	The system shall capture customer name, email, address and preferred language.	Must	PRD \$5.1
FR-CUS-003	The system shall allow a customer to save multiple addresses.	Must	PRD \$5.1
FR-CUS-004	The system shall perform basic customer verification (mobile, address and basic profile checks).	Must	PRD \$5.1
FR-CUS-005	The system shall allow a new customer to create a valid profile after OTP registration.	Must	PRD \$5.1

3.3 Service Discovery

ID	Requirement	Priority	PRD Ref
FR-SD-001	The system shall allow the customer to select a service category.	Must	PRD \$5.2
FR-SD-002	The system shall allow the customer to choose full-time, part-time, daily, hourly or live-in engagement.	Must	PRD \$5.2
FR-SD-003	The system shall allow the customer to enter location, preferred timings and start date.	Must	PRD \$5.2
FR-SD-004	The system shall allow the customer to specify a salary/budget range where applicable.	Must	PRD \$5.2
FR-SD-005	The system shall filter workers by category, location and availability.	Must	PRD \$5.2

3.4 Worker Discovery and Matching

ID	Requirement	Priority	PRD Ref
FR-WD-001	The system shall display worker cards showing profile photo, experience, skills, language, area and availability.	Must	PRD \$5.3, \$2.1, \$11
FR-WD-002	The system shall display verification badges on worker cards and profiles.	Must	PRD \$5.3, \$2.1, \$11
FR-WD-003	The system shall display a rating and review summary for each worker.	Must	PRD \$5.3, \$2.1, \$11
FR-WD-004	The system shall allow customers to shortlist/favourite workers.	Must	PRD \$5.3, \$2.1, \$11
FR-WD-005	The system shall return search results quickly with pagination.	Must	PRD \$5.3, \$2.1, \$11
FR-WD-006	The system shall provide a search and matching service; admin users shall be able to match and assign workers manually (see 3.17).	Must	PRD \$5.3, \$2.1, \$11
FR-WD-007	The system shall not expose full identity documents or sensitive identity data on worker cards or profiles.	Must	PRD \$5.3, \$2.1, \$11

3.5 Booking, Interview and Trial

ID	Requirement	Priority	PRD Ref
FR-BK-001	The system shall allow a customer to request an interview or trial with a worker.	Must	PRD \$5.4, \$7, \$8.1, \$15.1
FR-BK-002	The system shall allow the customer to select a preferred interview/trial date and time.	Must	PRD \$5.4, \$7, \$8.1, \$15.1
FR-BK-003	The system shall allow the customer to confirm a worker.	Must	PRD \$5.4, \$7, \$8.1, \$15.1
FR-BK-004	The system shall allow the customer to pay the applicable booking/platform fee.	Must	PRD \$5.4, \$7, \$8.1, \$15.1
FR-BK-005	The system shall display a booking status timeline to the customer.	Must	PRD \$5.4, \$7, \$8.1, \$15.1
FR-BK-006	The system shall implement a booking state machine governing permitted state transitions.	Must	PRD \$5.4, \$7, \$8.1, \$15.1
FR-BK-007	The system shall support the booking-management actions: new request, match, interview, trial, confirm, cancel and replace.	Must	PRD \$5.4, \$7, \$8.1, \$15.1
FR-BK-008	The system shall record interview/trial schedule, status and outcome.	Must	PRD \$5.4, \$7, \$8.1, \$15.1
FR-BK-009	The system shall allow Admin to track and change only permitted booking states.	Must	PRD \$5.4, \$7, \$8.1, \$15.1

3.6 Payments

ID	Requirement	Priority	PRD Ref
FR-PAY-001	The system shall integrate with an Indian payment gateway (Razorpay, Cashfree or PayU) supporting UPI, cards and net banking.	Must	PRD \$5.6, \$7, \$10, \$13
FR-PAY-002	The system shall generate payment receipts.	Must	PRD \$5.6, \$7, \$10, \$13
FR-PAY-003	The system shall maintain transaction history for customers.	Must	PRD \$5.6, \$7, \$10, \$13
FR-PAY-004	The system shall show refund status where applicable.	Must	PRD \$5.6, \$7, \$10, \$13
FR-PAY-005	The system shall correctly reflect payment success or failure against the related booking.	Must	PRD \$5.6, \$7, \$10, \$13
FR-PAY-006	The system shall record payment amount, gateway reference, status and refund details.	Must	PRD \$5.6, \$7, \$10, \$13
FR-PAY-007	The admin portal shall provide transaction status, fee records, refunds and invoice/reference exports.	Must	PRD \$5.6, \$7, \$10, \$13
FR-PAY-008	The system shall maintain audit logs for payment changes.	Must	PRD \$5.6, \$7, \$10, \$13
FR-PAY-009	The system shall use a provider abstraction layer so the payment provider can be changed and sandbox testing can start early.	Must	PRD \$5.6, \$7, \$10, \$13

3.7 Ongoing Service (Customer)

ID	Requirement	Priority	PRD Ref
FR-ON-001	The system shall give customers visibility of attendance/status for active engagements.	Must	PRD \$5.5
FR-ON-002	The system shall provide service history to the customer.	Must	PRD \$5.5
FR-ON-003	The system shall allow the customer to raise a support request.	Must	PRD \$5.5
FR-ON-004	The system shall allow the customer to rate the worker.	Must	PRD \$5.5
FR-ON-005	The system shall allow the customer to request a replacement.	Must	PRD \$5.5

3.8 Worker Onboarding

ID	Requirement	Priority	PRD Ref
FR-WON-001	The system shall allow a worker to register using mobile OTP.	Must	PRD \$6.1, \$8.2
FR-WON-002	The system shall capture the worker profile photo.	Must	PRD \$6.1, \$8.2
FR-WON-003	The system shall allow upload of Aadhaar/KYC documents.	Must	PRD \$6.1, \$8.2
FR-WON-004	The system shall capture address and emergency contact.	Must	PRD \$6.1, \$8.2
FR-WON-005	The system shall capture previous employer/reference details.	Must	PRD \$6.1, \$8.2
FR-WON-006	The Worker App shall split complex forms into short steps.	Must	PRD \$6.1, \$8.2

ID	Requirement	Priority	PRD Ref
FR-WON-007	The system shall support assisted onboarding to address low digital literacy.	Must	PRD \$6.1, \$8.2

3.9 Worker Work Profile

ID	Requirement	Priority	PRD Ref
FR-WP-001	The system shall allow the worker to select one or more roles.	Must	PRD \$6.2
FR-WP-002	The system shall capture experience and languages.	Must	PRD \$6.2
FR-WP-003	The system shall capture preferred work locations.	Must	PRD \$6.2
FR-WP-004	The system shall capture expected salary.	Must	PRD \$6.2
FR-WP-005	The system shall capture available timings.	Must	PRD \$6.2
FR-WP-006	The system shall capture full-time, part-time or live-in preference.	Must	PRD \$6.2

3.10 Worker Job Workflow and Ongoing Work

ID	Requirement	Priority	PRD Ref
FR-WJ-001	The system shall send job opportunities to workers.	Must	PRD \$6.3, \$6.4
FR-WJ-002	The system shall show workers a customer requirement summary.	Must	PRD \$6.3, \$6.4
FR-WJ-003	The system shall allow the worker to accept or decline an opportunity.	Must	PRD \$6.3, \$6.4
FR-WJ-004	The system shall show the interview/trial schedule to the worker.	Must	PRD \$6.3, \$6.4
FR-WJ-005	The system shall provide job confirmation and start date.	Must	PRD \$6.3, \$6.4
FR-WJ-006	The system shall allow workers to maintain attendance/status.	Must	PRD \$6.3, \$6.4
FR-WJ-007	The system shall show current job details to the worker.	Must	PRD \$6.3, \$6.4
FR-WJ-008	The system shall show earnings/payment reference where applicable.	Must	PRD \$6.3, \$6.4
FR-WJ-009	The system shall show ratings received by the worker.	Must	PRD \$6.3, \$6.4
FR-WJ-010	The system shall allow the worker to raise support and complaint requests.	Must	PRD \$6.3, \$6.4
FR-WJ-011	The Worker App shall use large buttons, limited text, simple status labels and be local-language ready.	Must	PRD \$6.3, \$6.4

3.11 Attendance and Status Tracking

ID	Requirement	Priority	PRD Ref
FR-ATT-001	The system shall record attendance/status per date, including exceptions.	Must	PRD \$2.1, \$5.5, \$6.4, \$12
FR-ATT-002	The system shall make attendance/status visible to the customer and the worker.	Must	PRD \$2.1, \$5.5, \$6.4, \$12

ID	Requirement	Priority	PRD Ref
FR-ATT-003	Attendance in V1 shall be status-based; GPS/geofenced and facial attendance are excluded.	Must	PRD \$2.1, \$5.5, \$6.4, \$12

3.12 Verification and Trust

ID	Requirement	Priority	PRD Ref
FR-VER-001	The system shall perform mobile OTP verification for users.	Must	PRD \$9, \$7, \$2.1
FR-VER-002	The system shall support government ID upload and manual or partner verification for identity.	Must	PRD \$9, \$7, \$2.1
FR-VER-003	The system shall support document/reference verification for address.	Must	PRD \$9, \$7, \$2.1
FR-VER-004	The system shall capture emergency contact and verify it where operationally feasible.	Must	PRD \$9, \$7, \$2.1
FR-VER-005	The system shall capture previous employment reference details and status.	Must	PRD \$9, \$7, \$2.1
FR-VER-006	The system shall track police verification status/documents; the process itself is external as applicable.	Must	PRD \$9, \$7, \$2.1
FR-VER-007	The system shall perform customer verification (mobile, address and basic profile checks).	Must	PRD \$9, \$7, \$2.1
FR-VER-008	The system shall provide Verification Executives/Admins with document review, approve/reject with remarks, verification status, expiry/recheck and re-verification.	Must	PRD \$9, \$7, \$2.1
FR-VER-009	The system shall not present a worker as fully verified until configured checks are completed and approved by an authorized operations user.	Must	PRD \$9, \$7, \$2.1
FR-VER-010	The system shall retain admin action, status and timestamps as an audit trail.	Must	PRD \$9, \$7, \$2.1
FR-VER-011	The system shall support a manual status workflow as fallback if the verification partner is unavailable.	Must	PRD \$9, \$7, \$2.1
FR-VER-012	The system shall display the worker verification status to workers.	Must	PRD \$9, \$7, \$2.1

3.13 Replacement Workflow

ID	Requirement	Priority	PRD Ref
FR-REP-001	The system shall allow the customer to select Request Replacement.	Must	PRD \$5.5, \$8.3, \$12
FR-REP-002	The system shall capture the replacement reason and supporting notes.	Must	PRD \$5.5, \$8.3, \$12
FR-REP-003	Support/Admin shall review replacement eligibility.	Must	PRD \$5.5, \$8.3, \$12
FR-REP-004	The system shall update the current engagement status.	Must	PRD \$5.5, \$8.3, \$12
FR-REP-005	The system shall match alternative workers.	Must	PRD \$5.5, \$8.3, \$12

ID	Requirement	Priority	PRD Ref
FR-REP-006	The system shall allow the customer to select a replacement worker.	Must	PRD \$5.5, \$8.3, \$12
FR-REP-007	The system shall confirm the new worker and keep history auditable.	Must	PRD \$5.5, \$8.3, \$12
FR-REP-008	The system shall record reason, approval and replacement booking.	Must	PRD \$5.5, \$8.3, \$12

3.14 Support and Complaints

ID	Requirement	Priority	PRD Ref
FR-SUP-001	The system shall allow ticket creation by customers and workers.	Must	PRD \$7, \$9.1
FR-SUP-002	The system shall allow ticket assignment, escalation and resolution with SLA tracking.	Must	PRD \$7, \$9.1
FR-SUP-003	The system shall record category, priority, owner and resolution for each ticket.	Must	PRD \$7, \$9.1
FR-SUP-004	The system shall maintain complaint history.	Must	PRD \$7, \$9.1
FR-SUP-005	The system shall provide report/block functionality.	Must	PRD \$7, \$9.1
FR-SUP-006	The system shall support dispute handling and escalation by Support Executives.	Must	PRD \$7, \$9.1

3.15 Notifications

ID	Requirement	Priority	PRD Ref
FR-NOT-001	The system shall send push notifications through Firebase Cloud Messaging.	Must	PRD \$2.1, \$7, \$11, \$12
FR-NOT-002	The system shall send SMS notifications.	Must	PRD \$2.1, \$7, \$11, \$12
FR-NOT-003	The system shall send WhatsApp notifications.	Optional	PRD \$2.1, \$7, \$11, \$12
FR-NOT-004	The system shall provide admin-configurable notification templates.	Must	PRD \$2.1, \$7, \$11, \$12
FR-NOT-005	The system shall record notification channel, template and delivery status.	Must	PRD \$2.1, \$7, \$11, \$12
FR-NOT-006	The notification service shall retry gracefully on failure of external providers.	Must	PRD \$2.1, \$7, \$11, \$12

3.16 Ratings and Reviews

ID	Requirement	Priority	PRD Ref
FR-RAT-001	The system shall allow customers to rate and review workers.	Must	PRD \$5.5, \$19
FR-RAT-002	Ratings shall be tied to completed/eligible engagements.	Must	PRD \$5.5, \$19

ID	Requirement	Priority	PRD Ref
FR-RAT-003	The system shall show an aggregated rating summary on worker profiles.	Must	PRD \$5.5, \$19
FR-RAT-004	The system shall show ratings to workers.	Must	PRD \$5.5, \$19

3.17 Admin and Operations Portal

The admin portal shall provide the following modules.

Module	Capabilities
Dashboard	Bookings, active workers, pending KYC, complaints, replacements, collections
Customer Management	Profiles, status, bookings, history, complaints, notes
Worker Management	Profiles, documents, availability, skills, rating, blacklist/status
Verification	Document review, verification status, expiry/recheck, remarks
Booking Management	New request, match, interview, trial, confirm, cancel, replace
Payments	Transaction status, fee records, refunds, invoice/reference exports
Support	Ticket creation, assignment, escalation, resolution SLA
Reports	Bookings, conversion, category demand, location demand, worker utilization
Configuration	Categories, areas, fees, plans, notification templates, roles

ID	Requirement	Priority	PRD Ref
FR-ADM-001	The system shall provide each module listed above in the Web Admin Panel.	Must	PRD \$7
FR-ADM-002	The system shall allow admins to view and manage customer profiles, status, booking history, complaints and notes.	Must	PRD \$7
FR-ADM-003	The system shall allow admins to view and manage worker profiles, documents, availability, skills and rating, and to blacklist or change worker status.	Must	PRD \$7
FR-ADM-004	The system shall allow admins to match and assign workers to booking requests.	Must	PRD \$7
FR-ADM-005	The system shall allow admins to configure categories, areas, fees, plans, notification templates and roles without code changes.	Must	PRD \$7

3.18 Access Control, Audit and Safety Controls

ID	Requirement	Priority	PRD Ref
FR-SEC-001	The system shall enforce role-based access control for admin users.	Must	PRD \$9.1, \$13, \$19
FR-SEC-002	Role restrictions shall prevent unauthorized admin access to sensitive screens.	Must	PRD \$9.1, \$13, \$19
FR-SEC-003	Access to sensitive KYC documents shall be limited by role.	Must	PRD \$9.1, \$13, \$19
FR-SEC-004	The system shall not publicly expose full identity documents.	Must	PRD \$9.1, \$13, \$19

ID	Requirement	Priority	PRD Ref
FR-SEC-005	The system shall mask sensitive information in routine screens.	Must	PRD §9.1, §13, §19
FR-SEC-006	The system shall provide suspension of workers and customers.	Must	PRD §9.1, §13, §19
FR-SEC-007	The system shall make emergency contact visible based on policy.	Must	PRD §9.1, §13, §19
FR-SEC-008	The system shall maintain audit logs (actor, action, timestamp, record) for critical administrative actions, including verification, payment and user-status changes.	Must	PRD §9.1, §13, §19

3.19 Commercial and Revenue Configuration

The software shall support multiple revenue models so the business can test the market without rebuilding payment logic. Actual pricing is to be finalized through market testing.

Revenue Stream	Example Model
Booking Fee	One-time fee for a confirmed booking
Placement Fee	Fee for successful monthly staff placement
Customer Subscription	Monthly/quarterly premium support plan
Verification Fee	Optional background/verification service
Replacement Plan	Extended replacement coverage
Apartment Partnership	B2B plan for communities
Employer Services	Bulk domestic-staff sourcing for organizations where applicable

ID	Requirement	Priority	PRD Ref
FR-REV-001	The system shall keep all fee values configurable from the admin portal.	Must	PRD §10
FR-REV-002	The payment logic shall support the revenue streams above without a rebuild.	Must	PRD §10
FR-REV-003	The system shall not hard-code pricing values.	Must	PRD §10

4. External Interface Requirements

4.1 User Interfaces

ID	Requirement	Priority	PRD Ref
EIR-UI-001	The Customer App shall allow a suitable worker to be found in a few steps.	Must	PRD \$1, \$6, \$7
EIR-UI-002	The Worker App shall use large buttons, limited text and simple status labels, with local-language readiness.	Must	PRD \$1, \$6, \$7
EIR-UI-003	The Admin Portal shall be responsive and support concurrent operations by multiple role-based users.	Must	PRD \$1, \$6, \$7
EIR-UI-004	The apps shall display responsive screens under normal mobile network conditions.	Must	PRD \$1, \$6, \$7

4.2 Software and Third-Party Interfaces

Interface	Recommended Provider	Purpose
Payments	Razorpay / Cashfree / PayU	India payment methods (UPI, cards, net banking)
Maps	Google Maps / map provider	Location, distance and service areas
Push notifications	Firebase Cloud Messaging	Android/iOS notifications
SMS / OTP	SMS provider (to be selected)	OTP and SMS notifications
WhatsApp (optional)	WhatsApp provider (to be selected)	Optional notifications
Verification partner	External partner (as applicable)	Identity/background verification; manual fallback required
Object storage	Cloud object storage	KYC documents and profile media

ID	Requirement	Priority	PRD Ref
EIR-SW-001	External integrations shall fail gracefully and be retried.	Must	PRD \$11, \$13, \$15, \$20
EIR-SW-002	Integrations shall use provider abstraction to reduce vendor lock-in and vendor-issue risk.	Must	PRD \$11, \$13, \$15, \$20
EIR-SW-003	Sandbox environments shall be used early for payment, maps and OTP vendors.	Must	PRD \$11, \$13, \$15, \$20

4.3 Communications Interfaces

- All application traffic shall use HTTPS.
- Mobile apps shall communicate through a Mobile API Gateway using token-based sessions.

4.4 Hardware Interfaces

No special hardware interfaces are specified. The apps run on supported Android and iOS devices; the agreed device and browser matrix shall be defined for testing and UAT.

5. Non-Functional Requirements

5.1 Security and Privacy

ID	Requirement	Priority	PRD Ref
NFR-SEC-001	HTTPS shall be used for all application traffic.	Must	PRD §13
NFR-SEC-002	Sensitive data shall be encrypted at rest where appropriate.	Must	PRD §13
NFR-SEC-003	Role-based access control shall apply to admin users.	Must	PRD §13
NFR-SEC-004	Access to KYC documents shall be restricted.	Must	PRD §13
NFR-SEC-005	Sensitive information shall be masked in routine screens.	Must	PRD §13
NFR-SEC-006	Admin passwords and integration secrets shall be stored securely.	Must	PRD §13
NFR-SEC-007	Audit logs shall exist for verification, payment and user-status changes.	Must	PRD §13
NFR-SEC-008	Rate limiting and abuse protection shall apply to OTP and API endpoints.	Must	PRD §13
NFR-SEC-009	A data retention/deletion policy shall be defined before launch (open item).	Must	PRD §13
NFR-SEC-010	Terms, privacy policy and consent flows shall be legally reviewed before production release.	Must	PRD §13

5.2 Performance and Reliability

Area	Target
Common App Screens	Responsive under normal mobile network conditions
Search	Results returned quickly with pagination
Availability	Configured for production scalability
Backups	Automated scheduled backups
Admin	Role-based concurrent operations
Reliability	Graceful failure and retry for external integrations

The PRD does not provide numeric performance or availability targets (e.g., response-time milliseconds or uptime percentage). These are open items to be agreed before the performance testing phase.

5.3 Operations and Maintainability

ID	Requirement	Priority	PRD Ref
NFR-OPS-001	The system shall be deployed on cloud infrastructure (AWS or Azure) with CI/CD and separate environments.	Must	PRD §2.1, §11, §13
NFR-OPS-002	Production monitoring and error alerting shall be in place using cloud logs and alerts.	Must	PRD §2.1, §11, §13
NFR-OPS-003	Automated database backups shall run on a schedule.	Must	PRD §2.1, §11, §13
NFR-OPS-004	The system shall be scalable to multi-city expansion.	Must	PRD §2.1, §11, §13

ID	Requirement	Priority	PRD Ref
NFR-OPS-005	New service categories shall be enabled through admin masters rather than app redesign.	Must	PRD §2.1, §11, §13

5.4 Usability

ID	Requirement	Priority	PRD Ref
NFR-USA-001	The Worker App shall be usable by workers with low digital literacy.	Must	PRD §1, §6, §20
NFR-USA-002	Local-language readiness shall be built into the Worker App; full multi-language UI (Telugu, Hindi and others) is Phase 2.	Must	PRD §1, §6, §20
NFR-USA-003	Complex forms shall be split into short steps.	Must	PRD §1, §6, §20

5.5 Compliance and Legal

- Legal review of terms, privacy policy and consent flows prior to release.
- Trademark, company-name and domain availability checks prior to public launch.
- Legal review required before introducing facial verification/attendance (not V1).

6. Data Requirements

6.1 Core Data Entities

Entity	Examples of Data
Customer	Profile, addresses, bookings, payments, ratings
Worker	Profile, skills, availability, verification, jobs, ratings
Service Category	Maid, driver, cook, etc.
Booking	Requirement, dates, status, selected worker
Interview/Trial	Schedule, status, outcome
Verification	Document type, status, reviewer, notes
Payment	Amount, gateway reference, status, refund
Attendance	Date, check/status, exceptions
Replacement	Reason, approval, replacement booking
Support Ticket	Category, priority, owner, resolution
Notification	Channel, template, delivery status
Audit Log	Actor, action, timestamp, record

6.2 Data Requirements

ID	Requirement	Priority	PRD Ref
DR-001	The system shall store data in a transactional relational database (PostgreSQL recommended).	Must	PRD §9, §12, §13
DR-002	KYC documents and profile media shall be stored in object storage with restricted access.	Must	PRD §9, §12, §13
DR-003	Database schema and migration scripts shall be delivered.	Must	PRD §9, §12, §13
DR-004	Replacement and booking history shall remain auditable.	Must	PRD §9, §12, §13
DR-005	Audit log records shall be retained for critical administrative actions.	Must	PRD §9, §12, §13
DR-006	Data retention and deletion rules are to be defined before launch (open item).	Must	PRD §9, §12, §13

7. System Architecture (Recommended)

7.1 Technology Stack

Layer	Recommendation	Reason
Mobile Apps	Flutter	Single codebase for Android and iOS
Admin Web	React	Fast, responsive operations portal
Backend/API	Node.js/NestJS or Java Spring Boot	Scalable service layer
Database	PostgreSQL	Transactional and relational data
Cache/Queue	Redis / managed queue	OTP, notifications, async jobs
Cloud	AWS / Azure	Scalable managed infrastructure
Storage	Object storage	KYC documents and profile media
Authentication	OTP + token-based sessions	Simple login with secure sessions
Push Notifications	Firebase Cloud Messaging	Android/iOS notifications
Payments	Razorpay/Cashfree/PayU	India payment methods
Maps	Google Maps / map provider	Location, distance and service areas
Monitoring	Cloud logs + alerts	Production issue visibility

7.2 High-Level Components

- Mobile API Gateway
- Authentication Service
- User/Profile Service
- Worker Verification Service
- Service/Category & Availability Service
- Matching/Search Service
- Booking Service
- Payment Service
- Notification Service
- Support/Complaint Service
- Reporting & Admin Service
- Audit & Security Layer

Technology choices are recommendations; final selection (e.g., NestJS vs Spring Boot, AWS vs Azure, payment provider) is to be confirmed during the Architecture phase (Weeks 1-4).

8. Core Workflows

8.1 Customer Journey

1. Login with OTP
2. Select service
3. Choose engagement type and timing
4. Enter location
5. View verified workers
6. Shortlist / request interview
7. Confirm worker
8. Pay applicable platform fee
9. Worker starts service
10. Track / rate / request replacement if required

8.2 Worker Journey

1. Register using OTP
2. Complete profile
3. Upload KYC and documents
4. Choose skills, areas and availability
5. Admin verification
6. Receive job match
7. Accept opportunity
8. Attend interview/trial
9. Job confirmation
10. Start service and maintain status/attendance

8.3 Replacement Journey

1. Customer selects Request Replacement
2. Reason and supporting notes captured
3. Support/Admin reviews eligibility
4. Current engagement status is updated
5. Alternative workers are matched
6. Customer selects replacement
7. New worker is confirmed and history remains auditable

8.4 Booking States

The PRD requires a booking state machine (Week 8) and lists the admin booking actions: new request, match, interview, trial, confirm, cancel and replace. The complete list of states and permitted transitions is not defined in the PRD and shall be finalized during design (see Section 14).

9. Reports and Analytics

ID	Requirement	Priority	PRD Ref
FR-RPT-001	New customers by day/week/month.	Must	PRD \$14, \$7
FR-RPT-002	Worker registrations and verification conversion.	Must	PRD \$14, \$7
FR-RPT-003	Booking requests vs confirmed bookings.	Must	PRD \$14, \$7
FR-RPT-004	Category-wise demand.	Must	PRD \$14, \$7
FR-RPT-005	Area-wise demand.	Must	PRD \$14, \$7
FR-RPT-006	Worker utilization.	Must	PRD \$14, \$7
FR-RPT-007	Interview-to-confirmation conversion.	Must	PRD \$14, \$7
FR-RPT-008	Cancellation rate.	Must	PRD \$14, \$7
FR-RPT-009	Replacement rate.	Must	PRD \$14, \$7
FR-RPT-010	Payment collections.	Must	PRD \$14, \$7
FR-RPT-011	Support ticket volume and resolution time.	Must	PRD \$14, \$7
FR-RPT-012	Top-rated workers and repeat customers.	Must	PRD \$14, \$7

10. Delivery Plan, Team and Deliverables

10.1 Phases

Phase	Period	Focus	Expected Output
Month 1	Weeks 1-4	Discovery, UX/UI, architecture, project setup	Signed requirements, wireframes, UI design, database/API foundation
Month 2	Weeks 5-8	Core backend + Customer App + Worker App + Admin modules	Login, profiles, categories, worker onboarding, search, admin basics
Month 3	Weeks 9-12	Booking, verification, payments, notifications, support, integrations	End-to-end booking flow, KYC workflow, payment sandbox, replacement/support
Month 4	Weeks 13-16	QA, security hardening, UAT, production deployment, store submission	Release candidate, UAT closure, production deployment, handover

10.2 Week-by-Week Plan

Week	Primary Activities
1	Kick-off, requirements workshops, user roles, service model, success criteria
2	User journeys, wireframes, data model, architecture, backlog
3	UI design system, customer screens, worker screens, admin screen design
4	Design sign-off, project environments, authentication/API foundation
5	Customer profile, addresses, service catalogue, worker onboarding
6	Worker skills/availability, admin customer/worker management, KYC upload
7	Search/filter/matching, worker cards, shortlist, interview request
8	Booking state machine, interview/trial workflow, admin assignment
9	Payment integration, receipts, booking confirmation, notification engine
10	Replacement, complaints/support, ratings/reviews, attendance/status
11	Admin reports, configuration masters, role permissions, audit logs
12	Integration completion, internal system testing, bug fixing
13	Full regression QA, device testing, performance/security checks
14	UAT with business team, operational training, critical fixes
15	Production configuration, deployment, app store/play store submission
16	Go-live support, handover, documentation, release stabilization

10.3 Milestones and Acceptance Gates

Milestone	Target	Acceptance Gate
M1 - Requirements Freeze	End Week 2	Approved scope and workflows
M2 - UI/UX Sign-off	End Week 4	Approved clickable screen designs
M3 - Core Alpha	End Week 8	Customer/worker/admin core flows working
M4 - Feature Complete Beta	End Week 12	All V1 features integrated

Milestone	Target	Acceptance Gate
M5 - UAT Ready	End Week 13	Regression passed; known issues documented
M6 - UAT Sign-off	End Week 14	Business acceptance of release candidate
M7 - Production Release	Weeks 15-16	Deployment + store submission + handover

10.4 Recommended Delivery Team

Role	Suggested Count	Responsibility
Project Manager	1	Plan, dependencies, client communication, delivery control
Business Analyst / Product Owner	1	Requirements, workflows, acceptance criteria
UI/UX Designer	1	Design system, app/admin UX
Flutter Developers	2	Customer and worker apps
Backend Developers	2	APIs, database, integrations, security
React/Web Developer	1	Admin portal
QA Engineers	2	Functional, regression, device and UAT support
DevOps/Cloud Engineer	1 part/full-time	CI/CD, environments, deployment, monitoring

A smaller team can build the product, but a four-month production commitment becomes higher risk if critical roles are shared across too many other projects.

10.5 Final Project Deliverables

- Customer mobile application source code
- Worker mobile application source code
- Web admin portal source code
- Backend/API source code
- Database schema and migration scripts
- Cloud deployment configuration
- API/integration documentation
- Admin user guide
- Operational workflow document
- Test summary and UAT closure report
- Production build packages
- Store submission assets/content support
- Basic handover/knowledge-transfer sessions

10.6 Change Control

V1 scope is frozen at M1 (end of Week 2). Major requirement changes after design sign-off (M2) shall be handled through a formal change-request process because they can affect the release date.

11. Acceptance Criteria

ID	Acceptance Criterion	Related Requirements
AC-01	A new customer can register via OTP and create a valid profile.	FR-AUTH, FR-CUS
AC-02	A worker can register, upload required documents and define service preferences.	FR-WON, FR-WP
AC-03	Admin can approve/reject verification items with remarks.	FR-VER
AC-04	Customer can search/filter suitable workers and view profiles.	FR-SD, FR-WD
AC-05	Customer can request interview/trial and complete a booking.	FR-BK
AC-06	Payment success/failure is correctly reflected against the booking.	FR-PAY
AC-07	Admin can track and change permitted booking states.	FR-BK, FR-ADM
AC-08	Customer can raise replacement/support requests.	FR-REP, FR-SUP
AC-09	Ratings are tied to completed/eligible engagements.	FR-RAT
AC-10	Role restrictions prevent unauthorized admin access to sensitive screens.	FR-SEC
AC-11	Critical workflows pass UAT on agreed Android/iOS test devices and supported browsers.	NFR, Section 10

12. Project Risks and Controls

Risk	Impact	Control
Frequent scope changes	Timeline slippage	Freeze V1 scope and use change requests
Verification partner dependency	Onboarding delay	Support manual status workflow as fallback
App-store review time	Launch uncertainty	Submit before final week where possible
Payment/map/OTP vendor issues	Blocked integration	Use sandbox early and keep provider abstraction
Low worker digital literacy	Poor adoption	Very simple UI, assisted onboarding, local-language readiness
Trust/safety incidents	Brand/legal risk	Strong verification, support, audit and suspension workflows
Insufficient test devices	Production defects	Defined device/browser matrix and regression plan

13. Hyderabad Launch Plan and Future Roadmap

13.1 Hyderabad Launch Plan

The product shall launch in a limited service area before city-wide expansion. Operations quality matters more than listing a large number of unverified workers.

Stage	Suggested Target
Pilot Areas	HITEC City, Madhapur, Kondapur, Gachibowli, Kukatpally
Initial Worker Pool	100+ verified/verification-in-progress workers
Priority Mix	Maids, drivers and cooks first
Customer Acquisition	Apartments, referrals, digital campaigns, local partnerships
Operations	Dedicated verification, matching and support team
Pilot Review	Track booking conversion, replacements, complaints and worker retention

13.2 Phase 2 and Future Roadmap (Not in V1)

- Multi-language UI (Telugu, Hindi and others)
- AI-assisted worker matching
- GPS/geofenced attendance
- Facial verification/attendance subject to legal review
- Worker training and certification
- Salary/payroll assistance
- Insurance/benefit partnerships
- Apartment/community dashboard
- Corporate/bulk workforce requests
- Referral and loyalty programs
- In-app chat/call masking
- Advanced fraud/risk analytics
- Multi-city operations dashboard

13.3 North Star

SevaNest shall be built around trust and operational simplicity rather than excessive features. The strongest launch proposition is: verified household staff, simple booking, transparent status and dependable replacement support.

14. Open Items and To-Be-Determined

The following items are explicitly left open by the PRD or not defined in it. They are retained as open and no values have been invented.

#	Open Item	Source / Note
1	Actual pricing and fee values	PRD §10 – to be finalized through market testing; configurable in admin
2	Data retention/deletion policy	PRD §13 – to be defined before launch
3	Legal review of terms, privacy policy and consent flows	PRD §13 – before production release
4	Trademark, company-name and domain availability for "SevaNest"	PRD §1.1 – before public launch
5	Applicable external verification processes (e.g., police verification) and verification partner selection	PRD §9 – external process as applicable
6	Final booking state list and permitted transitions	PRD §15.1 (Week 8) – not enumerated in PRD
7	Numeric performance/availability targets	PRD §13.1 gives qualitative targets only
8	Agreed Android/iOS test device list and supported browser matrix	PRD §19, §20 – to be defined
9	Final technology choices (backend framework, cloud provider, payment/SMS/WhatsApp providers)	PRD §11 – recommendations only
10	Eligibility rules for replacement and for rating (what is "completed/eligible")	PRD §8.3, §19 – rules not defined
11	Policy for emergency-contact visibility and sensitive-document access by role	PRD §9.1 – "based on policy"/"limited by role"

Appendix A – PRD to SRS Traceability Matrix

PRD Section	Title	SRS Section(s)
1	Product Overview & Executive Summary	1, 2.1, 2.2
2	Product Scope (In/Out of Scope)	2.2, 2.8
3	Users, Roles & Personas	2.3
4	Service Categories	2.4
5	Customer Application	3.2 – 3.7
6	Worker Application	3.8 – 3.11
7	Admin & Operations Portal	3.17
8	Core User Journeys	8
9	Trust, Verification & Safety Framework	3.12, 3.14, 3.18
10	Commercial / Revenue Model	3.19
11	Recommended Technology Architecture	4.2, 7
12	Core Data Entities	6
13	Security, Privacy & Non-Functional	5, 3.18
14	Reports & Business Analytics	9
15	Four-Month / 16-Week Delivery Plan	10.1, 10.2
16	Key Milestones & Acceptance Gates	10.3
17	Recommended Delivery Team	10.4
18	Final Project Deliverables	10.5
19	Sample Product Acceptance Criteria	11
20	Key Project Risks & Controls	12
21	Phase 2 & Future Roadmap	13.2
22	Suggested Hyderabad Launch Plan	13.1
23	Product Recommendation / North Star	13.3
App. A	Source Preservation / Traceability	1.6, 14
